"Upward Bound" is a federal program with an overall goal of promoting college access and success among secondary
school students from low-income families. To be eligible, applicants must have students from a school district
participating in the EPIACE program. The overall goal is to increase the number of students from low-income families
who successfully transfer from high school to college by 3-4%. To accomplish this goal, the Upward Bound educational
partnership grant provides school districts with funds to implement innovative programs and educational services to
increase the number of college-bound students. The grant is provided through the U.S. Department of Education as a
direct award to schools that have been approved by the Department's Office of Vocational and Adult Education as being
eligible for the program. Pages Sunday, March 30, 2012 A good picture a day I often think about taking pictures of my
kids. We haven't done that yet, but I think it's a good idea, especially when they're little. I think kids are a 2d92ce491b
