The implementation of the 5th Sound Card Having a high-quality sound card that enhances the sound of an MP3 player is now possible. The new MI-16XT with the RDS system allows you to connect to the FM band. It also supports a sound processing function of over 12 hours. The cost of the MI-16XT is much lower than that of the previous model, which allows you to enjoy the most realistic sound. The sound quality has also been improved to play the music more smoothly. The MI-16XT is available with the MP3 player that supports a higher sound quality, or you can simply connect it with the device having a standard configuration. Features of the MI-16XT High-quality sound processing function The MI-16XT is equipped with the most high-quality sound processing function. It uses the OSC sound technology to improve the sound quality to provide the most realistic sound possible. The number of the sound sources is 16, the center frequency is 88-108 MHz, and the sound quality is highest. Also, the sound volume can be controlled
