Automated plotting and design software AutoCAD is most often used for 2D drafting. It is also used for 2D-to-3D conversion (mapping), for 2D-to-2D conversion, for orthographic views, for exporting, for animations, for architectural rendering, for reverse engineering, and more. The “intelligent path” tool, the intelligent annotator and

the intelligent assist tools were added in the version 1.0 of AutoCAD to make it more automated than the previous version, AutoCAD 1.0. AutoCAD has been used in many industries. It has been used for designing housing units, aircraft, automotive, railroad equipment, marine and industrial equipment, watercraft, bridges and monuments. AutoCAD's design and drafting capabilities were widely

adopted by the oil and gas industry for the design of oil and gas production and processing facilities. For example, in 2004, BP (now listed on the London Stock Exchange as BP Group plc) spent £20 million on the construction of an AutoCAD facility. AutoCAD started out as a desktop app and later came to mobile and web versions. The earlier versions of AutoCAD could only be used on personal computers, whereas

the latest version can be used on laptops, tablets, desktops, and mobile devices. AutoCAD also has an ecosystem of solutions, training, services and third-party products that help in its use. In 2007, the revenue generated by the AutoCAD ecosystem was estimated to be \$4.6 billion. AutoCAD is owned by Autodesk. Autodesk has released many new features with each new version of

AutoCAD, and it introduced some new features every year. This article lists some of the key features in AutoCAD 2020 that are new in comparison to AutoCAD 2019 and AutoCAD 2018. administration application (not fully available on Windows platform)

History AutoCAD was first released in 1986 by Autodesk, Inc. as a DOS-based drawing and layout tool. The first version, 2.0, was released for Windows 3.1 in 1990. This software was written by the same team that had designed the architectural drafting software AutoCADlisp and the Java application package called The AutoCAD Java

Class Library (AutoCAD AJCL). The AJCL package is no longer sold by Autodesk, although the related AutoCADJava Class Library (AJCL) continues to be sold and is the basis for the Delphi development environment. AutoCAD was originally released for DOS, Macintosh, and PC-Windows. In 1997, it was released for the Windows NT platform. In 2001, it was released for the Windows 2000 platform.

AutoCAD has since been completely rewritten from the ground up for the Windows Vista platform. Development started in the mid-2000s, and was completed by 2012, but was still unreleased until May 13, 2014. Since then, two beta versions of AutoCAD for Windows (2014 and 2015) have been released to the public. The 2016 release of AutoCAD (AutoCAD 2016) also uses the Python programming

language, supporting Python scripting.

Create, view, and review designs in 3D:
With 3D modeling software, you can
create a 3D model to compare with the
design in your drawing. In AutoCAD

and AutoCAD LT, you can open 3D models from the Internet and view them in 3D. Also, you can explore the design in 3D by rotating, zooming, and panning around the model. (video: 4:35 min.) Create and manage electronic documents: Share and easily access electronic documents anywhere, from your device. Use e-mail to send comments about your drawings and receive feedback from customers and

colleagues. On the Web, use the Autodesk® Docs website to create, update, and manage text and graphics to any audience and in any format. (video: 2:45 min.) Additional information about new features and updates can be found in the Release Notes available on the Autodesk® website. About Autodesk® AutoCAD® software: Draw beautiful drawings and models. AutoCAD software is used by more

than 25 million professionals around the world. No other drafting software can come close to the speed, accuracy, or productivity of AutoCAD, and no other drafting software can deliver it all in a smaller form factor. AutoCAD LT software is easy-to-learn, easy-to-use software that is perfect for small and midsize businesses and schools.
