Mystic is a 90-year-old video game character who's had solo adventures in the past — and one leading in Myst V's Myst V world. In 2013, Tom Chatfield, a game designer who created Myst III, wrote an update on a 2004 interview where Myst creator Rand Miller said the character's character development was incomplete. Chatfield's answer? Myst V would try to move "the story forward further, deeper." And it turns out Chatfield and his team weren't kidding. It only took a couple of years to build a new world for the story. This August, players will get their hands on a demo of Myst V: End of Ages on the Xbox One, but the series' first game made its debut in 1999. It's one of the first "sandbox" games to have players explore a large landscape and build their own story. Chatfield says Myst V is a bit like a fantasy Lost. In many ways, the goal is to find a way back to the island. "We are challenging ourselves in the ways that Lost challenged us," Chatfield says. Chatfield says that you never know exactly where you're headed in the universe of Myst. You might even have to complete a task just to find out what lies beyond. "
