1. Field of the Invention The present invention relates to a movable unit assembly which permits access to and service of machinery such as presses, welders, lathes, etc. 2. Description of Related Art Numerous types of equipment such as presses, welders, lathes, etc., are oftentimes used for performing various machining operations. Such presses and welding machines, for example, are used for shaping and/or joining metal parts, which typically requires that the press or welding machine be leveled before the operation can begin. Also, a lathe is used for performing a wide variety of machining operations such as shaping, cutting, drilling, threading, etc. If a workpiece
